

Take the first step with NYC P-TECH Schools

OBTAIN YOUR...

- › High School Diploma
- › Associate's Degree
- › *and* Industry Experience

...ALL DURING HIGH SCHOOL!

**NYC P-TECH
SCHOOLS**

WHAT ARE NYC P-TECH SCHOOLS?

An innovative six-year high school program that prepares you for college and your future career in a competitive industry.

Each one of the seven NYC P-TECH schools is affiliated with:

- › A CUNY Community College that offers courses towards an Associate's Degree – at no cost to you.
- › An industry partner to help you explore careers and the skills needed to work in its field.

Our high schools are open to all students and are designed to go from Grade 9 into Grade 14 so that you can graduate with a high school diploma, earn college credits toward an Associate's degree, and gain work experience.

Each of our schools offers you the opportunity to:

- › Get early access to college courses while in high school
- › Earn a tuition-free college degree while in high school
- › Professional career experiences
- › Dedicated and talented staff who are focused on your academic, personal, and professional success

HOW DO I APPLY TO A NYC P-TECH SCHOOL?

Our schools are Limited Unscreened programs.

We give priority to students who demonstrate interest in the school by attending and signing in at a school's information session, open house event or by visiting the school's table at any one of the High School Fairs.

To Apply:

- › Be sure to attend an Information Session or Open House at one of our schools or visit our table at a High School Fair and sign in with the school.
- › Rank your NYC P-TECH School selection as a top choice when you submit your high school application

For more information about the High School Admissions process, visit <http://schools.nyc.gov/ChoicesEnrollment>.

OUR SCHOOLS

- 1 Business Technology Early College High School
- 2 City Polytechnic High School of Engineering, Architecture, and Technology
- 3 Energy Tech High School
- 4 Health, Education and Research Occupations High School
- 5 Inwood Early College for Health and Information Technologies
- 6 Manhattan Early College School for Advertising
- 7 Pathways in Technology Early College High School

Staten Island

WHAT IS THE NYC P-TECH SCHOOLS EXPERIENCE LIKE?

The NYC P-TECH Experience

The best way to learn about the culture of each school is to visit an admissions event at one of our schools. While no two schools are the same, there are core elements that you will find across all of our NYC P-TECH Schools.

- College Partner
- Industry Partners
- Career Exploration

What do students study at a NYC P-TECH School?

Similar to other high schools, NYC P-TECH 9-14 students take all the core subject courses required for a New York State Regents diploma.

In addition, from the time students enter ninth grade, both college and career preparation are integral parts of their lives at a NYC P-TECH school. Students may have the chance to experience:

- Taking college classes as early as 10th grade
- Job shadowing with one of our Industry Partners
- Career Panels
- Internships and Employer-Based work experiences

When do students start taking college classes?

Students can take their first college course as early as 10th grade! Each high school and its CUNY community college partner have guidelines for how students become eligible to take their first college class. Professionals at the high school and the college provide supports to students to help them prepare for and be successful in their college coursework!

What are the benefits of attending a NYC P-TECH 9-14 school?

A significant benefit is the opportunity to earn college credit at no cost to the student or family. The early college credits students earn can usually be transferred to fulfill some of the requirements of other majors, particularly at other colleges within the CUNY system.

Some of the other benefits include:

- Mentoring Experiences
- Career Exploration and Exposure
- Internship or Work-based Learning Experiences

No matter what field a student pursues after high school, the work-based learning and internships are valuable experiences that help build the student's resume.

Is there any cost to the family for students to take college courses?

There is no cost to the family as long as the student remains enrolled at his or her NYC P-TECH school. The student's college tuition, textbooks, and instructional materials are covered through a special agreement between the New York City Department of Education and CUNY.
